For the Video questions, you will need to look at the game in two different ways

Part 1: Team Tactic Standpoint.

- What did we do well?
- What could be improved?
- Were the tactics clear by watching the game?
- Did it affect the way the opposition played?
 - If so, How?

The above questions must be looked at from a tactical standpoint and when discussing, it should reference the Group and not individual players. The answers will be discussed on tactics and not on the individuals.

Part 2. Individual/Own Standpoint.

[This is based on your individual moments within the game]

- Did you execute your part of the tactical plan?
- What did you feel you could have improved on by watching the video?

These questions will focus solely on your own game actions and not the actions of any other player. [If you did not play in this game, you only need to answer Part 1 – Team Tactic Standpoint.]
