

# Player Profiles Part 2

## Assignment

For this week's assignment, Players need to develop a way of working on one area of their game they pick from their Player Profiles we sent out last week.

For example if a player says he wants to work on crossing he has to come up with a way to do that and share with us either by video or writing/explaining it. This can be done with a session plan, or types of drills and exercises to improve that skill or technique.

## Questions

1. What skill or technique do you want to improve on?
2. What drills or exercises would you do to improve this skill or technique?
3. Pick a point that you feel showcases what you need to work on?
  - a. You could also send a clip of the player you like that plays your position to show how well they do the certain skill.
4. From Previous game videos we sent or any other game you want to use as an example, pick out a skill or moment in the game where you could have done better?

Please refer to the player profiles below for reference to see skills needed for each player profile:
